Professional Summary

AI & ML undergraduate with experience in Full-Stack Development, AWS Cloud, DevOps, and Machine Learning. Skilled in REST APIs, CI/CD pipelines, Terraform, Docker, Kubernetes, FastAPI, Django, React.js, and scalable cloud-native application deployment on AWS.

Professional Experience

Full-Stack Developer Intern

07/2025 – 09/2025 | Remote, India

Greensoft Groups

- Developed REST APIs with JWT authentication, RBAC, dashboard analytics, and task management using FastAPI and SQLAlchemy.
- Built Django-based student polling and contact management systems with secure backend validation.
- Worked with HTML, CSS, JavaScript, Bootstrap, Django, Flask, and FastAPI for full-stack application development.

Education

B.Tech CSE with Specialization AI & ML

2023 – 2027 | Chennai, India

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

CGPA- 8.70

Skills

— **Languages:** Java, Python, JavaScript, C/C++ | **Backend:** FastAPI, Flask, Django, Spring Boot, ExpressJS | **Frontend:** HTML, CSS, React.js, Tailwind CSS, Bootstrap | **Cloud/DevOps:** AWS, Docker, Kubernetes, Jenkins, Terraform | **Tools:** Git, GitHub, Linux, SQLAlchemy | **AI/ML:** Machine Learning

Projects

Multi-Region AWS WordPress Deployment

- Designed and deployed multi-region WordPress infrastructure on AWS using VPC, EC2, RDS, S3, Route53, IAM, and Load Balancers with public/private subnet architecture.
- Implemented Route53 failover routing, ACM SSL integration, disaster recovery setup, and secure networking for high-availability cloud deployment.

Infrastructure Deployment Pipeline

- Built automated Infrastructure-as-Code deployment pipeline using Terraform modules, Jenkins Multi-Branch Pipelines, GitHub webhooks, and AWS services for provisioning VPC, EC2, subnet, and environment-specific infrastructure resources.
- Developed containerized CI/CD deployment workflow using Docker, Jenkins, and Kubernetes for scalable application delivery, automated deployment management, infrastructure consistency, and cloud-native orchestration across multiple environments.

Diabetes Prediction System

- Developed machine learning-based diabetes prediction system integrated with workflow automation, Google Sheets, and email services for automated prediction analysis, reporting, and notification management using Python and n8n.

Real-Time Event Synchronization Engine

- Built full-stack real-time messaging application using Spring Boot and WebSocket with persistent chat storage, responsive frontend integration, live communication handling, and modern user interface functionality.

Certificates & Achievements

Full Stack Development Internship Certificate

AWS & DevOps Certificate

NPTEL - Responsible AI & Safe Systems

Fusion Forge Hackathon Certificate

- Solved 300+ coding problems across LeetCode, CodeChef, HackerRank and Codeforces.

Language

- Languages:** English, Malayalam, Tamil
